

INTRODUCTION

ACUCAL K Type LED Dual Gooseneck illuminator is having two 300 mm long 3-Watt gooseneck lamps that can be bent into various positions. The controller features intensity-control for both lamp, allowing for customized lighting. This high-intensity cool lighting LED system is excellent for all applications including biological and electronics applications.

FEATURES:

- POWERFUL VARIABLE INTENSITY LED ILLUMINATOR
- GREAT FOR DISCRIMINATING LIGHTING
- PERFECT FOR EVENLY ILLUMINATING A SPECIMEN WITHOUT HEATING
- 6500 DEGREES KELVIN LAMP COLOR TEMPERATURE
- DURABLE METAL CONSTRUCTION
- INPUT VOLTAGE : AC 90-240V AC, 50/60HZ
- COLOR : BLACK

APPLICATION

It is very suitable for surface illumination of non-reflective objects, and is often used to observe and detect the edge of the objects, surface structure, traces etc such as components in the Printed Circuit board, liquid crystal glass substrates, metal and non metal surface dust, scratch damage, various kind of particles etc and is also the most common way of illumination for stereo microscopes.
